

ISIS 140.01: Web-Based Multimedia Communications
Course Evaluations, Spring 2008
Instructor: Richard Lucic

- Professor Lucic was awesome and really flexible. Great professor! This class made me happy. ☺
- Great class! No complaints!
- Course was fun/very interesting.
- Professor Lucic is very helpful, understanding, and fun☺ I've never done any programming or coding and liked learning through actually doing. Lucic and the TA were always available to answer questions when I got stuck on my website. Now I have my very own website I generated!
- The course provided a great introduction to web design both the theories and technique. The lab assignments were great. There is no better way to learn.
- Very helpful and encouraging feedback on your projects. It teaches you very valuable things.
